**GUIDELINES FOR
MINIMUM ACCEPTABLE SAFETY REQUIREMENTS
FOR OUTDOOR FIREPLACES**

LOCATION

The location of the fireplace shall be at least ten (10) feet from any over-hanging branches, stumps, logs, and trees.

FIREPLACE SITE

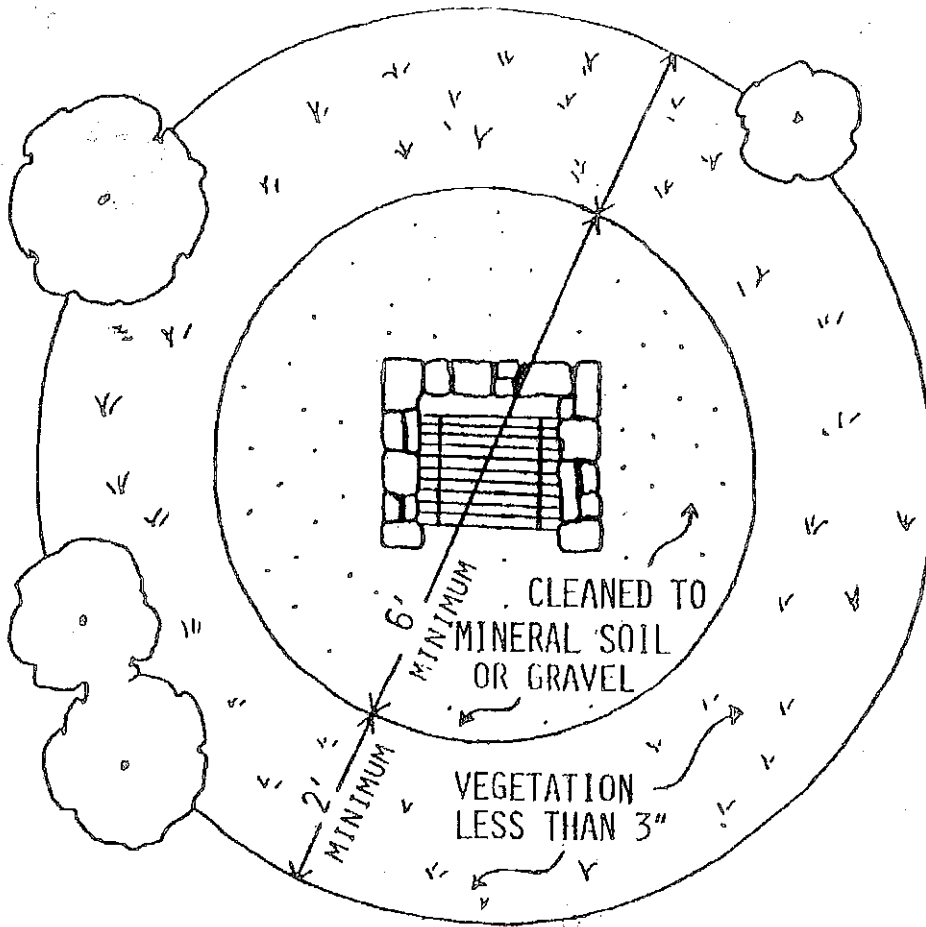

- A. The fireplace site shall consist of a circular area with a radius of five (5) feet.
- B. The fireplace pad will consist of a circular area with a radius of three (3) feet cleared to mineral soil and/or covered with gravel located in the center of the fireplace site.
- C. The remaining two (2) feet of the five (5) foot radius circular fireplace site may contain vegetation as long as the vegetation is less than three (3) inches in height.
- D. If the campground is surrounded by a road, the above "B" and "C" requirements may be deleted.

FIREPLACE CONSTRUCTION

- A. The fireplace must consist of at least three (3) sides not less than ten (10) inches in height.
- B. The fireplace must be constructed of non-combustible materials which are fastened together and in good condition.
- C. The fireplace will be located on the fireplace pad and be immobile.

MAINTENANCE

- A. Remove living vegetation that may be hanging within ten (10) feet of the fireplace.
- B. Keep litter removed from the fireplace pad.
- C. Replace components as their condition deteriorates to maintain minimum construction specifications.
- D. Ashes should be cold to the touch before disposal.
